NORTH AMERICAN ELECTRICAL FITTING

A: Hanging of this product should be carried out by a qualified electrician

- 1x Ceiling hook
- 1x Cord grip
- 1x Protective cup
- 1x Connector block

Existing cable house hold

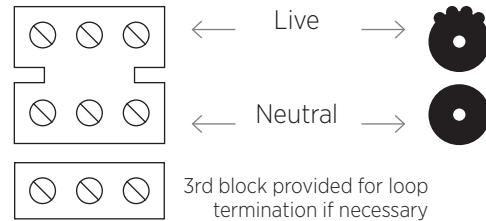

Step 1: Securely fix hook to desired surface with suitable fasteners.

Step 2: Cut cable to desired length

Step 3: After cutting wire to place protective cup on wire first

Step 4: Secure cord grip

Step 5: Secure connector block to wire

Checking that

You have correctly identified the house wires.

The connections are tight. No loose strands have been left out of the connection block. All wiring is clear of the pull cord switch.

Step 6: When completed, ensure that there are no bare or loose strands of wire exposed and cover all and cover all exposed areas of the connection block with 2 layers of insulation tape.

Step 7: Slide protective cup up the cable and secure into positive see image (B)

If in doubt consult qualified electrician. The light must be installed in accordance with all relevant local building regulations.

NOTE: The live wire in cabling has a serrated edge running the length of the wire

B: Finished installation [fittings not provided]
